### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 November 2007 has been entered.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 20 May 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of copending applications 11/225,673 and 11/368,197 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claims & Claim Objections***

Claims 1-3, 6-19, 21-27, and 34 are canceled by Applicant. Claim 20 is amended.

***Allowable Subject Matter***

Claims 20 and 28-33 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent claim 20, relevant prior art did not teach, alone or in combination, the transflective liquid crystal display device as claimed comprising a thickness adjusting layer, 6, having an edge substantially proximate to the transmissive display region and a sloping section, 60, that extends from the edge in a direction away from the corresponding substrate, the edge of the thickness adjusting layer and the slope at least adjacent to the edge being overlapped by a portion of the light-reflecting layer, 4. This structure prevents unwanted transmitted light leakage through the sloped region.

Art Unit: 2871

Figure 6(B):

(B)

Art Unit: 2871

The closest combination is Kubo et al (Kubo) USPAT 6,195,140 B1 in view of Kim et al (Kim) USPAT 6,522,377.

Kubo discloses a transfective liquid crystal device [electronic apparatus, TFTs] comprising:

a first substrate [bottom];

a second substrate [top]; and a liquid crystal layer held between the first substrate and the second substrate, wherein the first substrate includes:

a light-reflecting layer, 169, overlapping reflective display regions in plan view in pixel regions and in a non-overlapping condition with transmissive display regions in the regions of the pixel regions other than the reflective display regions; and

a thickness-adjusting layer, 170, setting the thickness of the liquid crystal layer in the reflective display regions to be smaller than the thickness of the liquid crystal layer in the transmissive display regions; and

slopes are formed in the thickness-adjusting layer at a transition between each reflective display region and transmissive display region; and

edges of the light-reflecting layer adjacent the transmissive display regions are substantially aligned with bottom edges of the slopes of the thickness-adjusting layer [steep slope so reads on substantially aligned per Figure 29].

Kim teaches the use of reflective-display color filters in the reflective display regions and transmissive-display color filters [col. 8, lines 5-25], which are colored more strongly than the reflective-display color filters, in the transmissive display regions [strength of color is set by thickness and by presence of non-colored material 106] to avoid an unwanted difference in color purity between the reflective and transmissive portions of the display [col. 4, lines 1-20].

**FIG. 5D**

However, no reference with proper motivation to combine was found to teach the claimed thickness adjusting layer having an edge substantially proximate to the transmissive display region and a sloping section that extends from the edge in a direction away from the corresponding substrate, the edge of the thickness adjusting layer and the slope at least adjacent to the edge being overlapped by a portion of the light-reflecting layer. Commonly owned references are not considered to read on the newly added claim limitations.

As to claims 28-33, they are directly or indirectly properly dependent upon claim 20 with allowable subject matter above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
